

Magnus Health

The Personal Health Record (PHR) Mobile App

The robust Magnus PHR mobile app allows parents to submit their student forms right from any 'smart' device at no cost! No more scanning... no more faxing... and no more mailing health records. This new app allows parent users to simply take a photo of health forms with any smartphone, and to upload them directly into their Magnus account.

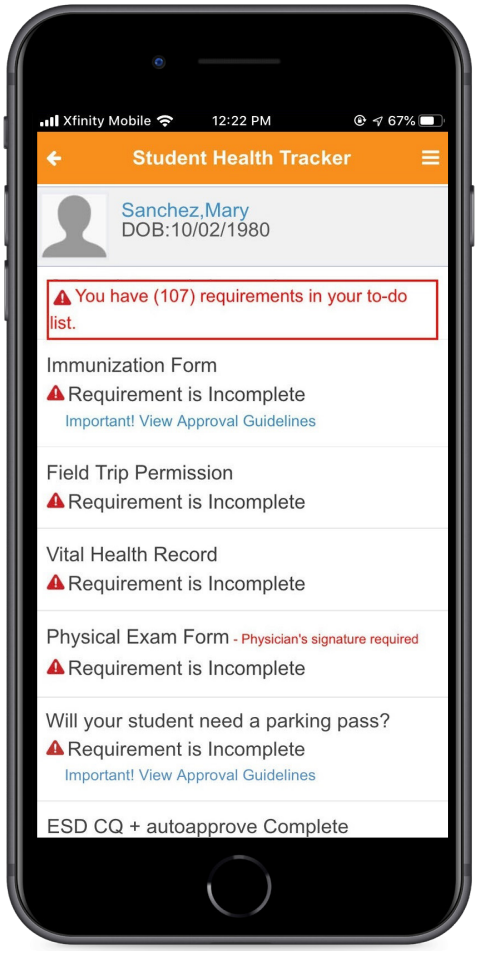

Parents can complete all requirements, fill in student health data, and receive app notifications from the school regarding their students all on their phone! These secure notifications keep parents abreast of health center visits, medication administration, or even a missing form for an upcoming field trip.

Parents Using the PHR Mobile App Can:

- Complete health data requirements seamlessly & on time with just a few clicks.
- Have "Forever" access to student health information, securely stored in the Magnus portal.
- Avoid having to contact the school for health forms post-graduation.

How to Download & Setup the PHR App

1. Log into Magnus as you normally would for your school. For most, this means logging into your school website and navigating to the Magnus Login button.
2. Hover over your name within Magnus (top left of screen).
3. Choose "Change Credentials".
4. Create a Username & Password that only you know and will remember. This username/password combination will be used as your PHR mobile app login only.
5. Download the "Magnus Mobile V2" App from the Apple Store or the Google Play store, and log in using your newly created username & password.

Contact the Magnus Help Desk today with any questions you have regarding your Magnus Account!
