

Use Digital Sources with Confidence

Sage Campus courses enable students and early researchers to improve confidence in handling digital sources, building an effective search strategy and assessing the relevance of information they discover. Learners will also develop their proficiency in assessing sources for bias and master effective data collection. Below you will find a selection of courses that can be recommended or assigned to learners who need support with using digital sources for data gathering and research.

What do you want to help your students with?	Sage Campus Courses
Using digital sources to search for information	<ul style="list-style-type: none"> › Develop Your Search Strategy Module 1: What Is a Search Strategy? Module 2: Boolean Logic Searches Module 3: Searching Online Repositories › Gather Your Data Online Module 1: What Types of Data Collection Can I Conduct Online?
