

# STEALTH™

HAND OVER HEAT

Developed, designed & perfected by:  
EnTech Boiler Controls, Inc.

FROM THE  
INNOVATORS  
BEHIND THE FIRST  
SMART BOILER  
CONTROL

## A BOILER CONTROL REVOLUTION

By giving you full control, the Stealth™ creates previously impossible synergy between property managers, mechanics and owners. Upgrade your boiler today with the most revolutionary—yet intuitive—monitoring and control system on the market.

### STREAMLINED

Stealth™ aggregates settings, stats and alerts of all your buildings in one easy, at-a-glance display

### INTUITIVE

Set it and forget it. Utilize the Stealth™ with smart cycles, PID logic pattern analyses and self-diagnostics

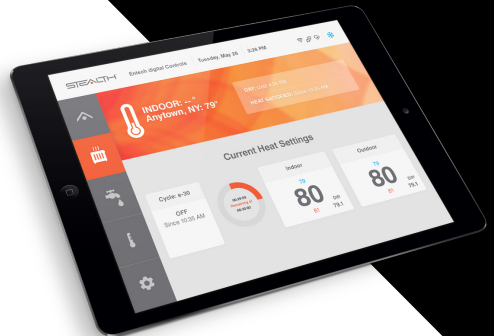

### COHESIVE

Powerful cloud integration provides interface continuity across Stealth™ and our web/mobile apps

### VERSATILE

Stealth™ redefines conservation and control with unlimited capacity and remarkable fuel efficiency

## A DASHBOARD YOU LEARN IN A DASH

Stealth™ delivers a carefully thought-through visual system with an intuitive 5-tab display that's consistent in the boiler room, on the web, and in our app.

Home, Heat Settings, Hot Water Settings, Sensor Readings and General Settings tabs bring you valuable data at a glance, including a warnings dashboard for emergency updates.

## CONTROL THAT CONNECTS YOUR TEAM

From average to majority readings to complex day-to-day configurations, Stealth™ puts endless control and specialized rulesets in the palm of your hand, granting your team absolute freedom to customize settings that meet your buildings' unique needs:

**Owners**  
get to keep tabs  
from across town or  
across the globe

**Managers**  
enjoy exceptional  
software and setting  
flexibility

**Mechanics**  
appreciate the  
ease of installation  
and setup

## COOL AND CAPABLE - FROM HEAT CYCLES TO PID LOGIC

Stealth™ introduces the most advanced technology to help you optimize boiler efficiency with no-hassle programming. The plethora of control options, such as smart-cycles, PID logic, Modbus protocol, burner modulation, and more, make full access a reality.

For pinpoint accuracy, newly configured cycles incorporate extensive temperature readings and then automate smart adjustments. You can even program automatic heat boosts under special conditions with the brand new Heat Boost feature.

## THE BEST OF ENTECH™— REVOLUTIONIZED

The Stealth™ builds on EnTech's trademark features, including diagnostic e-lets, energy management system, temperature history, graphs, charts, and more in a flash.

From mechanic to property manager to owner, Stealth™ is the most compelling energy management system package available. Our revolutionary technologies make boiler monitoring an absolute pleasure.

MORE POWER  
MORE CONTROL  
MORE SAVINGS  
MORE SIMPLICITY

A SYSTEM SO STEALTHY, IT PRACTICALLY RUNS ITSELF
