

## EPA Tools & Resources Webinar

# Chemical Safety for Sustainability Research Online Tools

Wednesday, February 14, 2024, at 3:00 to 4:00 PM ET

**REGISTER HERE**

*Certificates  
of attendance are  
offered!*

EPA produces a variety of computational and exposure tools and other online resources to assist in decision-making and researching the health effects of chemicals. These online resources offer a wealth of chemistry, toxicity, and exposure data that is publicly accessible. Types of available health and ecological effects information include access to: high-throughput screening, rapid exposure and dose, animal toxicity, chemistry, and virtual tissues data.

This presentation will provide brief overviews of EPA's CompTox and exposure tools and resources, such as Application Programming Interfaces (APIs), CompTox Chemicals Dashboard, EcoTox, and Chemical Exposure Knowledgebase (ChemExpo), and more.

Learn more: <https://www.epa.gov/comptox-tools>

**Who should attend?** States, tribes, local governments, non-profits, academic institutions, industry professionals, and other organizations interested in learning more about EPA's Computational Toxicology tools and resources.
