

Successfully manage your entire project from bidding to scheduling and onsite management to close-out – anytime, anywhere, from any device.

In an industry where time is money and the competition is fierce, it pays to have a clear view of every construction project detail—from the first take-off to the final close-out. The Acumatica Construction Edition and ProEst integration allow organizations to manage their projects and workflows seamlessly from start to finish - accelerating estimate production, enhancing accounting visibility, and providing real-time data that boosts the bottom line.

Increase productivity and collaboration between field and office teams from the bidding stage to final reconciliation.

The nature of the construction industry dictates that there are separate teams in office and field locations. Traditional ERP and Construction Management systems lead to siloed data, miscommunications, and unaligned processes in this business environment. A cloud-based, end-to-end estimating and construction accounting solution can give companies the project visibility and control needed to take their business to the next level. The Acumatica Construction Edition and ProEst integration provide office and job site teams the tools to communicate more effectively, collaborate in real-time, and share project data anytime, anywhere, and from any device.

KEY BENEFITS

INCREASE PRODUCTIVITY

Automated project setup data flows from Acumatica to ProEst with no need to enter the data twice.

ENABLE COLLABORATION

Synchronized field and office data give every employee a complete view of the project throughout the entire project lifecycle.

REDUCE DATA ERRORS AND DOUBLE-ENTRY

Data from one program is transferred to the other in real-time, eliminating costly errors and giving teams accurate, up-todate information.

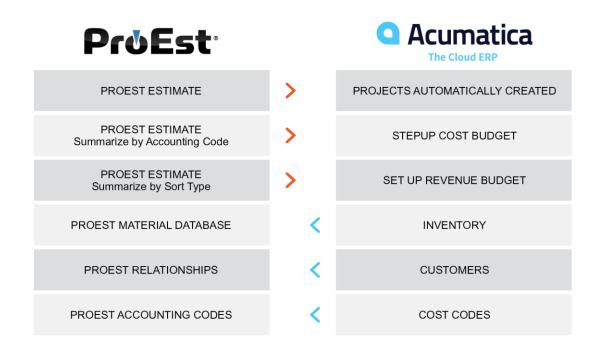

ABOUT PROEST

ProEst has helped more than 8,000 construction companies improve their estimating processes. Its innovative, easy-to-use cloud platform combines CRM, detailed cost estimating, digital takeoffs, and industry-specific databases to give you all the functionality you need in a single solution.
